PROFILE

Data Science Analyst with experience delivering advanced analytics, machine learning, and AI solutions within retail and banking environments. Skilled in Python, SQL, PySpark, Databricks, and statistical modelling, with a proven track record of building scalable analytical products and automation workflows that drive measurable business impact. Experienced in regression modelling, Bayesian analysis, and LLM-powered solutions, supported by a First-Class Mathematics degree and strong stakeholder engagement across technical and non-technical teams.

EXPERIENCE

Marks and Spencer – Data Analyst

July 2024 - Present

- Delivered advanced statistical analyses including Regression modelling, Hierarchical Bayesian modelling, Graph-Based Network optimisation, A/B testing, and hypothesis testing within the Data Science & AI Solutions team to support data-driven decision-making
- Delivered end-to-end data science solutions by transforming raw data into actionable insights and automation workflows, optimising data products that generated over £25 million in revenue savings
- Developed LLM pipelines with Retrieval-Augmented Generation (RAG) and agent orchestration to automate analytical reporting and documentation workflows
- Built scalable ETL pipelines in Databricks using Python and PySpark to process and transform large-scale retail datasets, improving data reliability and enabling downstream analytical modelling

Lloyds Banking Group – Data Analyst

March 2023 – July 2024

- Spearheaded data analysis within the Data Quality team as Lead Analyst on the Single Customer View Project, conducting in-depth analysis on live customer records
- Wrote complex SQL queries to extract, transform, and reconcile customer data across multiple systems containing 1,000,000+ customer records
- Performed large-scale data cleansing and validation using advanced Excel techniques to improve data accuracy and streamline operational processes
- Developed dynamic Power BI dashboards while collaborating with stakeholders to support business reporting and decision-making

Lloyds Banking Group – AML Analyst

February 2022 – March 2023

- Conducted KYC remediation for 2000+ SME and non-SME accounts accurately assessing risk ratings
- Researched and analyzed customer records with a 100% first-time pass rate, outperforming EY consultants
- Escalated high-risk clients and identified potential adverse media cases, ensuring compliance

EDUCATION

University of Surrey

Bachelor of Science, Mathematics

September 2018 – July 2021

- Grade:** First-Class Honours
- Relevant Modules:** General Linear Models, Experimental Design, Dynamic Asset Pricing, Statistical methods, Numerical and Computational Methods, Real Analysis, Quantum Mechanics

TECHNICAL SKILLS & SPECIALISMS

- Specialisms:** K-Means Clustering, LLM/RAG Pipelines, Price Elasticity Modelling, Sentiment Analysis, Forecasting, NLP, Graph-Based Network optimization, Experimentation
- Programming & Data:** Python, SQL, PySpark, R, Excel, Databricks
- Analytics & AI:** Regression Modelling, Hierarchical Bayesian Modelling, A/B Testing, Machine Learning, LLMs, Retrieval-Augmented Generation (RAG)
- Tools:** Power BI, Streamlit, Git, Jira, Confluence, Miro
- Business Skills:** Stakeholder Management, Automation, Data Storytelling
